Main components of the Prins EcoMax LPG-system:

- 1 LPG Tank
- 2 ECU
- 3 Prins switch
- 4 LPG Reducer
- 5 Filter
- 6 Injectors

Highlights:

 <p>LPG Reducer</p> <ul style="list-style-type: none"> • Single stage and provides high heat transfer • The cut-off valve and filter are integrated • Compact design for easy installation 	 <p>Fuel Selector Switch</p> <ul style="list-style-type: none"> • Thanks to its compact design, it can be easily installed • Indicates the LPG level in the tank with LED lights • When the LPG in the tank runs out, it warns the driver with a buzzer
 <p>Injector Rail</p> <ul style="list-style-type: none"> • It has 3Ω electrical resistance • It has a compact design with advanced technology • With a minimum duration of 2.6 ms it does not change performance 	 <p>AFC Compact</p> <ul style="list-style-type: none"> • Is suitable for up to 4 cylinders with identical software and hardware strategy to the proven AFC-2 • Calibration wizard function • No OBD
 <p>Filter Unit</p> <ul style="list-style-type: none"> • Compact design for easy assembly • The filter unit has a single outlet • The recommended change interval is 10,000km or 1 year 	 <p>Pressure and Temperature Sensor</p> <ul style="list-style-type: none"> • It provides precise measurement of gas pressure • Easily mounted • It also measures the gas temperature, allowing the system to operate at optimum performance
