Main components of the Prins TechnoMax LPG-system:

1 LPG Tank

2 ECU

3 Prins switch

4 LPG Reducer

5 Filter

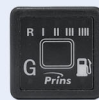

6 Injectors

Highlights:

LPG reducer

- 1.2 Bar delta pressure setting
- Map connected
- Additional ECT sensor
- Pressure relief valve
- R67-01 and R10-03 regulations

Fuel Selector Switch

- Thanks to its compact design, it can be easily installed
- Indicates the LPG level in the tank with LED lights
- When the LPG in the tank runs out, it warns the driver with a buzzer

Gemini Injector Rail

- Excellent linear flow range
 - linear flow starts from 2,6 msec
 - 6% accuracy from min. to max. flow
- 1 nozzle size in the kit 1,75 mm
- Engine capacity from 10kW up to 25 kW each cylinder
- Low coil resistance (1,8 Ω)

AFC Compact Pro

- Is suitable for up to 4 cylinders with identical software and hardware strategy to the proven AFC -2
- CAN OBD connection
- Callibration wizard function
- Split fuel possible

Filter Unit

- Compact design for easy assembly
- The filter unit has a single outlet
- It provides precise measurement of gas pressure
- It also measures the gas temperature, allowing the system to operate at optimum performance
- The recommended change interval is 10,000 km or 1 year
